

KEKETSO LEU

FULL-STACK SOFTWARE DEVELOPER | REACT • NEXT.JS • C#.NET • POSTGRESQL

Johannesburg, Gauteng | 069 260 2709 | keketsoleu25@gmail.com
linkedin.com/in/keketso-leu | github.com/keketsoleu25 | keketso-leu.vercel.app

PROFESSIONAL SUMMARY

Full-stack software developer with hands-on experience building and deploying production web applications, APIs and database-backed systems. Strongest in React, Next.js, TypeScript, PostgreSQL and Prisma, with practical experience in C#, ASP.NET Core, Entity Framework Core, Python and Docker. Built CRM, job-intelligence and facilities-management systems spanning frontend interfaces, backend services, authentication, relational data, analytics and deployment. Comfortable translating business requirements into maintainable software, debugging across application layers and communicating with technical and non-technical stakeholders.

TECHNICAL SKILLS

Languages & Front End: JavaScript, TypeScript, React, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Back End: C#, ASP.NET Core, Entity Framework Core, Node.js ecosystem, Next.js App Router, PHP, Python

Data & APIs: SQL, PostgreSQL, Prisma ORM, REST/HTTP APIs, JSON, Zod, relational data modelling

Tools & Delivery: Git, GitHub, Docker, Vercel, Neon PostgreSQL, CI/CD fundamentals, OpenCV, Resend

Engineering: Debugging, validation, authentication/authorization, responsive UI, secure-coding awareness, documentation, requirements analysis, Agile-style delivery

SELECTED PROJECT EXPERIENCE

Facilities Management Toolbox | C# • ASP.NET Core • EF Core • PostgreSQL • PHP • Python/OpenCV • Docker

- Built a multi-service facilities platform connecting an ASP.NET Core API, Entity Framework Core data access, PostgreSQL persistence, a PHP administration portal and Python/OpenCV attendance processing.
- Developed employee and attendance workflows, dashboard analytics, active-session tracking and service integrations using REST/HTTP APIs and JSON.
- Containerised the API, PostgreSQL database and portal services with Docker Compose, including service health checks and persistent storage.

Tech Alchemy CRM | Next.js • React • TypeScript • Prisma • PostgreSQL • Auth.js

- Built and deployed a CRM covering client intake, projects, Kanban tasks, proposals, invoices, payments, analytics, notifications and a client portal.
- Implemented authentication, authorization and ownership controls, validation, API rate limiting, relational data models and database-backed business workflows.

Alchemy Job Finder | Next.js • React • TypeScript • Prisma • Neon PostgreSQL

- Built a South Africa-focused job intelligence workflow covering opportunity ingestion, normalization, eligibility filtering, matching, application tracking and market analytics.
- Implemented scraper architecture, data validation and database models designed to normalize jobs from multiple sources into a consistent workflow.

PROFESSIONAL EXPERIENCE

Founder / Full-Stack Developer — The Tech Alchemy Lab | South Africa | 2023–Present

- Build and deploy client-facing websites, web applications and digital business tools from requirements through production delivery and maintenance.
- Work across frontend, backend, APIs, databases, authentication, debugging, deployment and client communication while maintaining projects with Git/GitHub.
- Translate incomplete or non-technical requirements into practical software solutions and explain technical decisions clearly to clients and stakeholders.

Digital Associate — YES Programme / UVU Africa / Schauenburg Systems | Oct 2024 – Nov 2025

- Completed structured workplace experience focused on digital technology, cybersecurity foundations, professional communication and practical problem-solving.
- Strengthened analytical thinking, independent learning and secure-development awareness through technical assessments and workplace tasks.

Student Ambassador — Feenix.org | North-West University

- Promoted the student-funding platform, guided students on using the service and supported campus engagement activities.
- Built confidence presenting information clearly and communicating with students and stakeholders from different backgrounds.

EDUCATION & TRAINING

CodeSpace Academy — Software Development / Frontend Development Training | 2022–2023 | 75% average

- Frontend Development certificate covering HTML, CSS, Bootstrap, JavaScript, Vue.js, GitHub, deployment and design principles.

North-West University — BSc Computer Science & Statistics Studies | 2019–2022 | Not completed

- Relevant studies included Python programming, C++, Statistics and quantitative problem-solving.

National Senior Certificate — Simunye Secondary School | 2014

- Mathematics 61% | Physical Sciences 71% | Life Sciences 69% | Sesotho Home Language 73%

ADDITIONAL DEVELOPMENT

- BET Software Hackathon 2025 — Participant.
- Cybersecurity learning through workplace programme, including CySA+-aligned concepts and assessments.
- Continuing development in Docker, CI/CD, cloud platforms, testing and modern software engineering practices.
