

KEKETSO LEU

FULL-STACK SOFTWARE DEVELOPER

Johannesburg, Gauteng, South Africa | keketsoleu25@gmail.com | 069 260 2709
linkedin.com/in/keketso-leu | github.com/keketsoleu25 | the-tech-alchemy-lab.vercel.app

PROFESSIONAL SUMMARY

Full-Stack Software Developer building production-ready web applications across frontend, backend, authentication, databases and deployment. Hands-on experience developing a full-stack CRM, authentication infrastructure and a Facilities Management Toolbox using Next.js, React, TypeScript, C#.NET, Python, Prisma and PostgreSQL. Experienced in translating practical business requirements into working software, debugging across the stack and deploying applications to production.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS

Backend: C#, ASP.NET Core/.NET, Next.js, Python, PHP, REST APIs

Database & ORM: PostgreSQL, Prisma, Entity Framework Core, Neon

Authentication: Auth.js/NextAuth, Google OAuth, credentials authentication, email verification, password recovery

Tools & Deployment: Git, GitHub, Vercel, Resend, PDFKit

Additional: OpenCV, computer vision, responsive design, API integration, role-based access control

SELECTED SOFTWARE PROJECTS

Facilities Management Toolbox | Full-Stack Developer

C#.NET, ASP.NET Core, PostgreSQL, EF Core, Python, OpenCV, PHP

Developing a modular facilities-management platform combining a C# REST API, PostgreSQL persistence, employee administration and operational dashboards. Built attendance workflows with employee validation and IN/OUT tracking, dashboard reporting, shift-policy logic and a Python/OpenCV facial-recognition attendance prototype.

Tech Alchemy CRM | Full-Stack Developer

Next.js, React, TypeScript, Prisma, PostgreSQL, Auth.js, Resend, PDFKit

Designed and built a production-deployed CRM covering clients, projects, Kanban task management, invoicing, analytics and a client portal. Implemented authentication, PostgreSQL persistence, PDF invoice generation, validation and application security controls.

Standalone Authentication System | Full-Stack Developer

Next.js, TypeScript, Auth.js, PostgreSQL

Built and deployed a reusable authentication application supporting credentials authentication, Google OAuth, email verification and password recovery.

EXPERIENCE

Founder & Full-Stack Developer | The Tech Alchemy Lab | 2023 - Present | Johannesburg, South Africa

Design, develop and deploy web applications and digital systems for practical business requirements. Own the software lifecycle from requirements and UI implementation through backend integration, databases, testing, debugging and production deployment.

Digital Associate | YES Programme - UVU Africa / Schauenburg | 2024 - 2025

Completed a 12-month professional placement focused on digital technology, workplace experience and technical development, including exposure to cybersecurity and professional technology environments.

EDUCATION & TRAINING

CodeSpace Academy | Software Development / Frontend Programme | 2022 - 2023

Completed frontend and JavaScript-focused software development training.

North-West University | BSc Computer Science & Statistics Studies | 2019 - 2022

Completed university-level studies in Computer Science and Statistics; degree not completed.

Westcol TVET College, Randfontein Campus | Engineering Studies / Boilermaking | 2015

Completed N2 Mathematics, Engineering Science and Mechanotechnology; progressed to N3 Mathematics.

Simunye Secondary School | National Senior Certificate | 2014

Completed the National Senior Certificate with admission to bachelor's degree studies.
